Bizcope
Experience the Progress!

OVERVIEW AND GOALS

Dear Tawfick Kamal,

It was a great discussion with you on your upcoming project.

Gone are the days when we knew for certain that everyone was viewing the web on a desktop or laptop computer so websites were designed and developed for that standard experience. Increasingly, people are viewing the web on a variety of devices - tablets, smartphones and other mobile devices. If your website doesn't support those devices, this can negatively affect how users interact with your business. The site may load slowly, the layout is fixed and awkward to navigate and you may end up with a frustrated user. Statistics show that most users don't convert when using small-screen devices which means you may be losing out on valuable business opportunities.

The Bizcope team can turn this problem around using *responsive design*. We'll redesign your website's front-end templates to adapt and scale to whatever kind of device the user is viewing from while maintaining your existing look and feel and improving overall performance. We'll test it on a variety of devices - mobile and non-mobile - to ensure the experience is consistent and easy to use.

We want to improve your conversion by 50% for mobile users which, given the current percentage of users who visit websites on mobile devices currently, should impact sales by 20% per month. Now that's what you'd call responsive, don't you agree?

Sincerely,

Nahid Hasan
CEO
Bizcope Digital Ltd

OUR CRDENTIALITY

WEBSITE DEVELOPMENT FOR E-SECURITIES LTD.

In 2021, a key way to make sure your business is successful is to really establish your online presence. an attractive website is important. An attractive website design is one that intrigues viewers and makes them want to explore your website more. our website should be an interesting designed format to represent your business online. It should reflect your business to attract visitors to your site, who may become your potential clients. Great first impressions are a long-standing statement to present oneself. However, this can also be extended to a website design. After all, you are presenting your business to potential clients via modern technology.

So, Now let's see what are the scope of Service regarding web development:

Research

The first step is we need to thoroughly understand your business, your business goals, your customers and their expectations and behavior, and how your website factors into all of it. We'll also look at the competitive landscape to establish context and benchmarks for how your site should function and then improve on that. This stage will give us the foundation for moving forward with just the right recommendations for the design and development of your new responsive website.

Design

Once we're armed with this information, we'll set to work sketching out interface layouts for 3-5 different views, including the home page, subpage, the blog template, and any additional templates needed. Wireframes look like simple skeletons of your website without the visual polish of the finished design, allowing us to experiment and iterate on solutions quickly so that we have a good sense of how content should be laid out across different screen sizes.

Next, we'll design high-fidelity comps that show what the final designs will look like on desktop, tablet, and smartphone screen sizes, providing up to two rounds of revisions on the design.

Development

Once you've approved the design, we'll start building them using HTML, CSS, and Javascript.

WordPress Integration

After testing the static layouts, we integrate the new designs with your current WordPress theme. To do this we'll need to mirror your live site in a development environment, then our QA department will test the site across different browsers (Firefox, Chrome, Safari, Internet Explorer 9+) and devices (iPhone 4S, Galaxy II). Any bugs that arise from this testing will be fixed prior to launch.

Additional Recommendations

User Testing

Although not required, testing the designs with real users will greatly improve the quality of the finished design and help catch usability issues before time is spent building out the designs. User testing involves our usability professionals recruiting up to 5 users and asking them to perform tasks. We record the results of the test and then deliver the video to you along with a list of usability issues or comments that our design team can implement. It's like the digital version of the old adage "Measure twice, cut once."

Support Retainer

We recommend retaining our services after the site is launched to assist with any further support issues that arise. As part of this retainer, we will also provide monthly analytics reports and recommendations to further improve your site conversion.

Key Technical feature:

- **Search Engine Optimization (SEO)** module to ensure the site is SEO compliant. (Please note that we do not guarantee search page rankings.) The website also automatically submits a self-generated site map to Google and other main search engines on a scheduled basis.
- **Back-end Content Management Systems (CMS):** Uses the Word Press content management platform
- **Responsive design:** website adjusts automatically to different screen widths. (Compatible with tablets and mobile devices.)
- **Attractive, landing (home) page** with easy, intuitive navigation menus and a wide-screen image slideshow linking to the selected products you wish to highlight.
- **Automated website backup** module for added security, which could be enabled anytime (as per confirmation); can email full site and database backups to you on a scheduled basis.
- **SSL Certificate** could be included for certified and secured (https://) signal on demand. free for the first year. After one year you have to renew this.
- Complies with International Standard Cookies Law.
- **Social Media integration:** Social networking integration: with Facebook, Twitter etc
- Compatibility with all major web browsers. Page optimization for rapid browser load and slow internet browsing friendly.
- Theme-based design permits rapid redesign of each website in the future if required.

OUR WEBSITE DESIGN PROCESS

BIZCOPE- DESIGN YOUR WEB IDENTITY

Already we have made a different type of web identity for brands in local & international market. let me give you some example of those:

TIMEFRAME

To complete the work outlined in the project scope, we'll need approximately 6 weeks from beginning to end, depending on when we receive feedback at each milestone. Upon signing the proposal we are prepared to start work immediately.

PHASE	WEEK
Research	1-2
WordPress Integration and Development	3-4
Feedback and Further Modification	5-6

YOUR INVESTMENT

Below is the budget we've estimated based on the scope of services outlined earlier in this proposal. If you have any questions about our pricing or need to increase or decrease the scope of work, please leave a comment and let us know.

Task	Package B
Web Design & Development (WordPress)	20 Pages
Basic Content Development/Modification (if required)	1000 Words
Image Content (creative)	10 Images
Basic Integration (Social media and chat box)	Yes
Blog/News/Media/Press Release	Yes
Free Support	4 Months
SEO Integration	Yes
Total	69,000 BDT

- Additional content work will cost additional charges.
- All price is excluded VAT (5% Additional charge)
- Free training will be provided

SCOPE OF WORK-DIGITAL MARKETING

Social Media Marketing is a powerful tool for businesses to improve customer engagement. If it is not organized with a proper structure it might create a major impact on your business. We have gone through your Facebook page to present some findings.

Engaging with High-quality (Video & Blog Content):

- **Video Production:** Videos are a valuable, powerful way to tell your brand's story, showcase your product or service, and engage with your target audience. We're not talking infomercials here, we're talking about compelling, interesting, and emotionally engaging storytelling that can make your business come to life online. There are a lot of things involved in developing a compelling video, but our extensive experience has taught us how to be a lean, mean, production machine.
- **Blog Content:** Providing consistently valuable content for your target audience is a time-intensive process involving a significant amount of research, writing, editing, publishing, and distributing. Let us take care of all of that for you. Our skilled team of content creators will produce monthly articles on topics relevant to your target audience.
- **Creative Content (Image/GIF):** creative content is very much essential for effective social media marketing especially when you talking about image part. Visuals are essential to creating content that will help your business stand out and draw in an audience. Bizcope will help you create a proper creative strategy for your brand.

An effective lead magnet is an essential part of attracting qualified leads into your marketing funnel. We can identify and produce valuable content that your target audience is willing to exchange their contact information for. In addition to creating the lead magnet content, we will design a compelling landing page and drip email campaign to nurture leads for your sales team.

Content Distribution Strategy in Social Media Platform

Great content doesn't hold much value if no one reads it. That's why it is essential to develop a strong content distribution strategy.

- **Social Media platform:**Both organic and paid social media techniques are essential to delivering content to your target audience. We use a variety of tools to deliver content across a mix of social networks, including Facebook, Instagram, Twitter, and LinkedIn. These tools allow us to deliver the right message to the right person at the right time. How, you might ask? We make sure you're in the loop with a content calendar that defines what goes to whom, where, and when.

- **Email Marketing:** You've got mail! Well, currently you have a list of emails, but we'll make sure that list receives the right content when it's most appropriate. You may think email marketing is passé, but with a 4400% ROI and \$44 returned for every \$1 spent, email is still one of the most effective digital marketing techniques.
- **Paid Advertising:** Organic social media and email marketing are great distribution channels, but they're limited by their reach of your target audience. In order to extend the reach of your messaging further than your email lists and social media followers, we will employ sophisticated paid advertising techniques to distribute your content to your target audience via paid search, paid social media, sponsored content, and display advertising.

Brand Building for your company

we will work for your brand as if it is our own brand. Brand building or development is the process where we are [creating and strengthening your professional brand](#). As we help firms develop their brands, we divide the process into three phases.

- The first phase is getting your brand strategy right and aligned with your business objectives.
- Secondly after developing the strategies and try to implement those strategies in different platforms where is it actually needed and try to build strong brand communicate engagement with the brand and consumers. the brand, such as your logo, tagline, and website.
- Finally, after implementing all those things we will closely monitor your brand activity and identify a few areas where we need to work on.

Conversion Optimization

- **Analytics:** Before we can implement a complete conversion rate optimization plan, we will need to implement the appropriate web analytics tracking tools on your website to gain insight into user behavior. We'll set up conversion tracking for both macro and micro conversions to accurately measure digital marketing success and return on investment.
 - Subscribing to a service
 - Subscribing to an email list
 - Starting a trial
 - Adding a product to the cart
 - Downloading a lead magnet

Reporting

How do you know if all of this is working? Don't worry - we provide monthly reports including valuable campaign metrics and results, as well as a summary of all the awesome optimizations and insights we gained from the previous month. We'll let you know which pieces of content, social channels, and paid media tactics are performing the best, how many conversions you are getting, and what we are doing to deliver those conversions as effectively as possible.

CREATING NEW CHANNELS

1. **Facebook Group:** Creating a community around our brand is mandatory. And we should maintain it ourselves to have proper control. A Facebook group can help us get more organic reach and can generate more sales. Here is a group we are maintaining for a US-based fintech company:
<https://www.facebook.com/groups/1622355088008222>
2. **Influencer Marketing:** There are a good amount of tech and gaming influencers (in YouTube and Facebook), and we can utilize their brand value to promote our brand to the right audience.
3. **Instagram Marketing:** Instagram marketing is now highly trendy and competitive. 2 million users in Bangladesh engaged on this platform. so we have a huge possibility in this market. Instagram users were individuals aged between 18 and 24 years old, at 70.5% so we have a high potential percentage of people on this platform.

INVESTMENT AND FORECAST

Task	Monthly Fee- 6 Months Contract	Includes
Bizcope Consultancy	BDT 25,000 (Per Month)	• Image creative creation (up to 4 per months) • Ad funnel creation • Facebook/youtube ad management • Data analysis • Content calendar creation • Research and scale up opportunities • Facebook pixel setup • Custom audience creation • Retargeting funnel creation and management.
Media Buying (FB/Youtube/Instagram/Linkedin)	BDT 25,000 (Per Month)	

****Consultancy fee is Included Vat.**

Investment for Creative Content (Ad Hoc)

Segmentation	Pricing
Image Retouch (Product Image)	BDT 300

Blog Post (500 word Standard)	BDT 3000

HIGH-LEVEL FORECASTING

Keyword Number	Total Search Volume (approx.)	Expected new traffic/month (10% -15%)
10	10000	(1000- 1500+)
20	16000	(1600-2400+)

Note: Search engine traffic is very targeted and they convert better than any other traffics. Also, each search engine traffic can be a good potential to get more referral traffic and direct traffic.

OUR STRATEGY AT A GLANCE

- Finding the right keywords that generate sales.
- Competitors' analysis to find their best keywords.
- Technical and Onpage SEO to make your site SEO friendly.
- Content optimization to ensure google fall in love with our content.
- Building high-quality backlinks to increase site authority, link juice, and rank.
- Let analytics decide what is our next data-driven changes to get your business on top.

Click to play video in browser

IF YOU LOVE DETAILS, CHECK THE FOLLOWING DETAILS/ STRATEGY

Initial Setup

Performing SEO Audit

- We'll start by having a kick-off meeting to review the audit and get your feedback on where we plan to focus our efforts so we all know we're on the page starting out.

Setting Up Tools

- We'll make sure your analytics tools are set up properly and configure Google Analytics and Google Webmaster Tools to measure what traffic is contributing to your sales conversion.
- We use other valuable tools like ahrefs, SEMrush, Moz that provide information on where your links are coming from, competitive analysis, keyword research tools, brand monitoring, and more.

Onpage Optimization

- Based on the audit, we'll execute any necessary changes to your site which may include things like content edits, changing the title and meta description, updating your robots.txt and XML sitemap, using 301 redirects, and making usability tweaks to the design.

Ongoing Services:

Landing Pages

- Landing pages help you rank for targeted keywords and we'll help you develop them. Instead of one page trying to rank for multiple keywords, it's better to create a separate page for every keyword you want to target. The page should contain valuable, in-depth content that's way better than your competitors. The more useful and comprehensive your landing page, the higher Google will place in their search rankings.

Link Building

This is where we engage with people to receive links. The goal is to get high quality vs. high volume links as Google penalizes sites that have too many low quality links. How will we do this?

- Engaging influencers associated with your brand, commenting on their blog articles, sharing their social media posts, and eventually sending them emails requesting links.
- Publishing high-quality, free content and posting it to social media. This is what's known as link bait. It could be a free tool like a pricing calculator, an e-book, an in-depth guide on a topic that's important to them and relevant to your brand, or a helpful infographic.

- Engaging and contributing to forums, groups, and other more targeted communities that are likely to share and blog about your content.
- Reaching out to the press and relevant bloggers for media coverage, interviews, and product reviews.

Measurement and Optimization

- We'll review Google Analytics and other metrics tools to make sure we're staying on track with our goals.
- We'll perform ongoing keyword research and analyze your place in them.
- We'll uncover where you should be ranking and what traffic will drive the most revenue.
- We'll alter your website accordingly by building pages and content to rank for the most valuable keywords.

Additional Recommendations

For a more holistic approach, we also recommend a social media strategy or an inbound marketing strategy and retainer.

KEYWORD RESEARCH

In our initial keyword research, we have found around 20 keywords that have around 16000 search volumes per month. If we can rank them on the first page, we can expect more than 15% traffic of total search volume that represents 2400+ new organic traffic per month.

ON-SITE & Technical SEO

On-site, and technical SEO are very important when it comes to optimizing your website. We will analyze and optimize your site on the following ranking factors (not limited to):

1. Competitor research
2. Keyword research
3. Google Search Console (GSC) & Google Analytics (GA) Setup and Analysis
4. Working with URL structure
5. Optimizing your menu and site structure
6. Optimizing your XML sitemap and submit to Search engines
7. Handling canonical URLs
8. 404 Page optimization
9. Title / meta description /Heading tag optimization
10. Product description optimization
11. Image optimization
12. Category page optimization
13. Internal linking strategy

MEASURING RESULTS - SEO

From our analysis, we have estimated around 20 keywords that can be targeted to rank on the first page of Google search results. The total volume of those keywords is 16000 per month. If we target and rank those keywords, the estimated new traffic per month will be more than 2400+.

Number of Keywords	Total Search Potential/Month (Approximate)	Expected New Traffic/month (15%)
10	10000	(1000- 1500+)
20	16000	(1600-2400+)

YOUR INVESTMENT - SEO

Below is the budget we've estimated based on the scope of services outlined earlier in this proposal. The pricing may change if the target keywords are more competitive than we have estimated.

Monthly Investment For Your Project

Keywords	Monthly Investment	Usual Price for Overseas Clients	Contract Period
10	35,000 BDT	\$1500	6 months (renewable quarterly)
20	45,000 BDT	\$2000	6 months (renewable quarterly)
